PROFILE

Indusrial Design Masters student passionate about exploring ideas and turning them into simple, thoughtful & joyfull designs. I enjoy concept development, sketching, and rapid prototyping. Curious and hands on, I like experimenting with new tools and approaches to create products and experiences that are both functional and enjoyable to use.

WORK EXPERIENCE

Lifeworks design | Israel

2025-2026

Product designer & UX UI

- Spent my time at Lifeworks working accross different industries. everything from tech gadgets to lifestyle gear. I focused on creating cool, user-centered designs that fit perfectly into the portfolios of international brands. While at LifeWorks, I took a lead role in the physical development of products . This included building prototypes, iterating on designs through 3D models, and refining technical details.

Shim Edri Design | Tel Aviv

2025-2026

Product designer

- I completed an internship at SHIM EDRI Studio in Tel Aviv, focusing on furniture and textile design. I gained hands-on experience working with materials and color

Memory Block | Vic | Australia

2020-2023

Operations Manager & Designer

- Oversaw the design, production, and retail presentation of custom UV-printed photo products, focusing on the relationship between material, form, and user experience. Managed nine retail locations and a team of 40+, ensuring cohesive brand identity.

EDUCATION

2022- 2027

BEZALEL ACADEMY

- Bachelor of Design.
- Masters of Design Student. Excellence program

2010-2016

HARTMAN HIGH SCHOOL

- Graduated Hartman Institute

SKILLS

- UX UI
- Product design + 3D Models
- Prototyping
- Conceptual thinking
- Generated AI
- Wireframing
- User research

SOFTWARE

- Solidworks
- Keyshot
- Photoshop
- Illustrator
- Figma
- After Effects
- Premier pro

LANGUAGES

- English (Native)
- Hebrew (Native)

Design, for me, is both a mindset and a craft. It's about understanding how people engage with objects, tools, and experiences- and finding ways to make those interactions intuitive, meaningful, and enjoyable. As an Industrial Design student at Bezalel Academy, I'm drawn to projects where creativity meets function, and ideas evolve into solutions that feel simple to use.

My experiences across diverse fields have shaped how I think about design and about **People**. At Memory Block, I managed product development and operations for personalized photo products, collaborating with teams to refine materials, forms, and usability. Serving in a technological unit in the IDF taught me to balance precision, clarity, and real-world constraints, merging creativity with practical problem-solving. Working as a sous chef in a high-end kitchen challenged me to consider timing, presentation, and user satisfaction in every detail and Leading informal education programs introduced me to a wide range of people and needs, encouraging me to think flexibly and creatively about interaction, engagement, and problem-solving.

I'm inspired by projects that balance innovation with clarity, where design enhances how people interact with their environment and with each other, whether through physical products, digital interfaces, or experiences that combine both. I aim to bridge concept and execution, creating solutions that are thoughtfully designed, enjoyable to use, and that spark curiosity and insight in everyday **Life**.

Best Regards
Ethan Goldshmid
